

# AMBROSIA CROPZ

## BATCH MIXING INSTRUCTIONS

1. Individually weigh out the amount of Ambrosia Cropz Nutrients that corresponds to the EC / PPM and amount of gallons you intend to mix.
2. Fill your reservoir to the desired amount of water.
3. Add the desired amount of Ambrosia Cal to the water in the reservoir and agitate or allow to recirculate.
4. Add the desired amount of Ambrosia Mag to the water in the reservoir and agitate or allow to recirculate.
5. Next, add the desired amount of Ambrosia Cropz Vegetative Growth Formula or Ambrosia Cropz Fruit & Flowering Formula (depending on the plants growth phase) to the water in the reservoir and agitate or allow to recirculate.
6. Verify EC and PH by testing a sample of thoroughly mixed batch solution and adjust as needed.
